FOR IMMEDIATE RELEASE

ONE-G SIMULATION AND CIGNATEC COLLABORATE ON WWI-ERA SOPWITH CAMEL SIMULATORS FOR SEATTLE'S MUSEUM OF FLIGHT

SEATTLE, [11/29/23] — The Museum of Flight in Seattle, Washington is set to take aviation enthusiasts on a nostalgic journey back to World War I with the recent unveiling of two Sopwith Camel simulators designed and built by local company one-G Simulation, in collaboration with Cignatec, an education technology company. These simulators are an integral part of the Museum's WWI exhibit, offering visitors an immersive flying experience in the iconic aircraft.

one-G Simulation, renowned for its expertise in professional aviation training simulators, was delighted to be commissioned by the Museum of Flight to recreate the WWI-era Sopwith Camel experience. These simulators allow museum-goers to step back in time and experience the thrill of flying a WWI fighter aircraft through a range of user-activated scenarios.

The Sopwith Camel simulators are a testament to the commitment of local companies in preserving aviation history. one-G Simulation and Cignatec, both headquartered in the vibrant Seattle area, have combined their expertise to create an educational and entertaining experience for museum visitors.

"As a longtime resident of Seattle, it has been a pleasure collaborating with the Museum of Flight, successfully bringing the experience of flying a Sopwith Camel into the hands of the general public," said Xylon Saltzman, one-G simulation CEO. "With a unique merge of one-G's present-day simulation technology paired with traditional craftsmanship techniques, this project pays homage to the bravery of the pilots who flew these legendary aircraft."

Josh Swanson, President of Cignatec, expressed his enthusiasm for the collaboration, stating, "As a long-time member of the Museum of Flight, and advocate for STEM education, supporting the museum with this project has been a privilege and a lot of fun — and of course, it's always great to work with one-G."

one-G Simulation is a leading provider of FAA-approved aviation training devices, specializing in creating realistic and immersive experiences for pilots worldwide. Based in the Seattle area, the company is committed to pushing the boundaries of simulation technology.

Cignatec is an education technology company dedicated to transforming learning experiences through innovative technology solutions. Headquartered in Seattle, Cignatec collaborates with industry leaders to create engaging and effective educational tools.
