

## ONE-G ACCESS™

An unrivaled business model, one-G Access™ is a program that allows flight schools and fixed base operators to acquire an FAA approved advanced aviation training device (AATD) on a pay-per-use basis. No upfront costs; no long-term contracts.

The landscape of pilot training is changing. With Access,™ your business can afford to keep up - risk-free.

We'll deliver our FAA approved pilot training simulator to your facility at no cost to you

We plug it in and train your staff on its use

You start making money

### THE TECHNOLOGY

one-G Access™ brings together two of our premier products: the one-G foundation™, a model-specific AATD based on the Cessna®172 single engine aircraft, and the 1G-IOS™, an instructor operating station that allows instructors to create scenario-based training sessions through an intuitive web-based interface.

### THE PRODUCT DETAILS

#### one-G foundation™

- Positioned on 360 degree total lock castors, rolls through a 36" standard pedestrian doorway, allows the device to be placed in a variety of locations
- Single 115 volt, 15 amp outlet makes for painless installation
- The foundation™ features one-G's signature suite of avionics, including the 1G-650™, a GPS emulator module based on the popular Garmin® GTN™

#### 1G-IOS™

- Controlled by a wireless tablet, the 1G-IOS™ software works in tandem with the one-G foundation™ to provide unique flight training scenarios that are only possible on the ground
- Instructors create complex scenario-based situations stemming from system failures, variable weather patterns, and airport approach profiles

### THE FINE PRINT

- We bring the one-G foundation™, complete with the 1G-IOS™, to your facility and absorb all delivery and installation costs
- We install the AATD and fully train your staff on its use, providing detailed tutorials on how to train students using the foundation™ and the 1G-IOS™ software
- We help you market the product and set a reasonable hourly rental rate based on your market
- We receive a percentage of the hourly rental rate - that's how we make money with Access™; you keep all instructor fees
- We remotely monitor use of the machine and bill you monthly
- We provide a sliding scale pricing incentive - the more you use the device, the less it costs
- We make ourselves available to help troubleshoot, answer questions, and help you get the most out of the technology

### THE BOTTOM LINE

Access™ exemplifies the one-G mission of improving aviation safety through model-specific training devices that are accessible to all pilots.

We see Access™ as a way to help your businesses grow and evolve by providing your customer base with an affordable, high-tech training tool with unmatched usability for students of all levels.
